

800 kg

320 kg

Este equipo es totalmente modular y permite montar distintas parrillas para vidrios de diferentes pesos y dimensiones, hasta 800 kg. Su principal característica es que trabaja con vidrio curvo, con radio mínimo R750 en cóncavo y R430 en convexo, aunque también admite parrilla para vidrio plano.

Funciona con batería o conexión a red. Destaca su rotación motorizada eléctrica de 360° sin fin y la basculación hidráulica motorizada de 0° a 90°, ideales para trabajos de instalación, ya que permiten compensar movimientos de forma cómoda, segura y rápida.

This is a fully modular equipment that can be configured with different grill layouts for various weights and dimensions, up to 800 kg. Its unique feature is its ability to handle curved glass with a minimum radius: R750 for concave and R430 for convex. The grill can also be changed to accommodate flat glass.

It operates on battery power and can also be powered by electricity. Key features include electric motorized rotation up to 360° and hydraulic motorized tilting from 0° to 90°, both highly useful for daily installation work on site. These features allow for convenient, safe, and quick adjustments to compensate for any necessary movement.
